

Salesforce Virtual Internship Program SmartInternz

**Project Title: Food Connect - To Supply
Leftover Food to the Poor**

NAME : KONCHADA VAISHNAVI
E-MAIL : 322103311026@gvpce.ac.in
COLLEGE NAME : GAYATRI VIDYA PARISHAD
COLLEGE OF ENGINEERING(A)

1. Project Overview

This project focuses on the development of a Salesforce-based application, "Food Connect," aimed at facilitating the efficient distribution of leftover food from donors to underprivileged communities. By leveraging Salesforce's robust platform, the application optimizes daily operations, improves data accuracy, and provides actionable insights into food donation and distribution processes.

Designed to address the pressing issue of food waste and hunger, this application automates critical processes such as tracking food donations, inventory management, volunteer coordination, and generating real-time reports.

The primary challenge addressed by this project is the inefficient handling of food donations, which can lead to delays and wastage. By providing a comprehensive, user-friendly solution, Food Connect ensures effective resource management, strengthened donor relationships, and seamless reporting.

Through this project, Food Connect aims to achieve:

1. **Operational Excellence:** Automating routine processes to ensure timely collection and distribution of food.
2. **Data-Driven Decision Making:** Equipping stakeholders with real-time insights into donations, distributions, and volunteer activities.
3. **Scalability and Efficiency:** Supporting long-term growth with a secure, scalable, and flexible solution.

2. Objectives

Business Goals:

1. **Streamlining Operations:** Automating processes such as food donation tracking, inventory updates, and volunteer task allocation.
2. **Improved Decision-Making:** Delivering detailed reports and dashboards for real-time analytics, enabling better allocation of food resources and strategic planning.
3. **Enhancing Donor Relationships:** Providing personalized insights into donor contributions and feedback.
4. **Ensuring Data Security:** Implementing role-based access controls to restrict sensitive information to authorized users.

Specific Outcomes:

1. A centralized platform to monitor and manage food donations and distributions effectively.
2. Real-time automated reports on food collection, distribution, and beneficiary statistics.
3. Reduction of manual errors in data entry and calculations.
4. User-friendly dashboards to visualize key metrics and insights.

3. Salesforce Key Features and Concepts Utilized

1. Reports and Dashboards:

- Automated generation of daily, weekly, and monthly reports on food donations, inventory levels, and distributions.
- Dashboards displaying critical metrics such as most active donors, top distribution locations, and food wastage trends.

2. Rollup Summary Fields:

- Summarizes data from child records to parent records in master-detail relationships.
- Examples:
 - a. Total food donated by each donor.
 - Total meals distributed in a specific location.

3. Cross-Object Formula Fields:

- Enables calculations across related objects.
- Example: Total beneficiaries reached calculated using Quantity of Food Distributed × Average Meals per Unit.

4. Validation Rules:

- Ensures data accuracy and completeness.
- Example: The ISBLANK formula prevents saving records with missing mandatory fields, such as food quantity or beneficiary details, and displays error messages to guide users.

5. Permission Sets and Organization Wide Defaults (OWD):

■ Configures access levels based on roles:

- a. **Admin:** Complete access to all records.
 - **Volunteer Coordinator:** Access restricted to volunteer-related records.
 - **Volunteer:** Limited access based on assigned tasks.
- Ensures sensitive data is protected while enabling collaboration.

4. Detailed Steps to Solution Design

Requirement Gathering:

1. Conducted discussions with stakeholders, including donors, volunteers, and community leaders, to understand operational pain points, reporting needs, and goals.

Data Model Design:

2. Created custom objects for "Food Inventory," "Donor," "Distribution," and "Beneficiary." • Defined relationships:
 - Master-detail relationship between "Food Inventory" and "Donor."
 - Lookup relationship between "Distribution" and "Beneficiary."

User Interface (UI) Design:

3. Developed intuitive Lightning Pages tailored to different user roles (e.g., Admin Dashboard, Donation Entry Form).
4. Included custom components to facilitate data entry and quick access to reports.

Business Logic Implementation:

5. Automated workflows for low inventory alerts and donor notifications.
6. Developed Apex classes and triggers for advanced calculations and inventory updates.

Reports and Dashboards:

7. Configured reports to highlight:
 - Daily food donations and distributions.
 - Inventory levels and wastage trends.
 - Volunteer activity metrics.
8. Dashboards provide real-time visualizations for quick decision-making.

Documentation and Screenshots:

9. Documented all components, configurations, and workflows with accompanying screenshots for clarity and reference.

Object : Salesforce objects are database tables that permit you to store data that is specific to an organization. What are the types of Salesforce objects

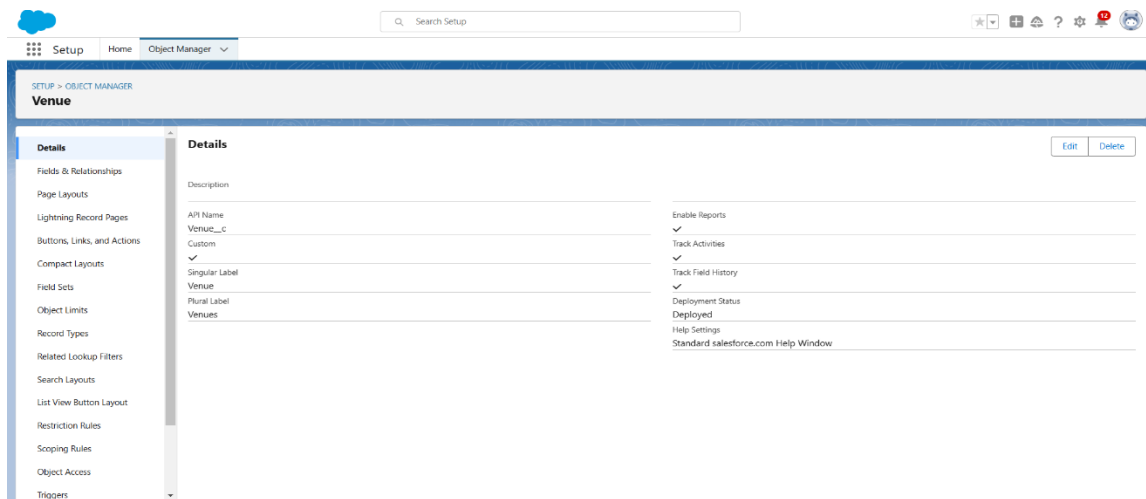

Creating required objects : To Navigate to Setup page

To create an object:

1. From the setup page > Click on Object Manager > Click on Create > Click on Custom Object.
2. On Custom object defining page:
3. Enter the label name, plural label name, click on Allow reports, Allow search.
4. Click on Save.

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >>Click on Custom Object.
1. Enter the label name >> Venue
2. Plural label name >> Venues
3. Enter Record Name Label and Format
 - Record Name >> Venue Name
 - Data Type >> Text
1. Click on Allow reports and Track Field History,Allow Activities.
2. Allow search >> Save.

Setup > Object Manager > Venue

Tabs

A tab is like a user interface that is used to build records for objects and to view the records in the objects.

Types of Tabs:

Custom Tabs

Custom object tabs are the user interface for custom applications that you build in salesforce.com. They look and behave like standard salesforce.com tabs such as accounts, contacts, and opportunities.

Web Tabs

Web Tabs are custom tabs that display web content or applications embedded in the salesforce.com window. Web tabs make it easier for your users to quickly access content and applications they frequently use without leaving the salesforce.com application.

Visualforce Tabs

Visualforce Tabs are custom tabs that display a Visualforce page. Visualforce tabs look and

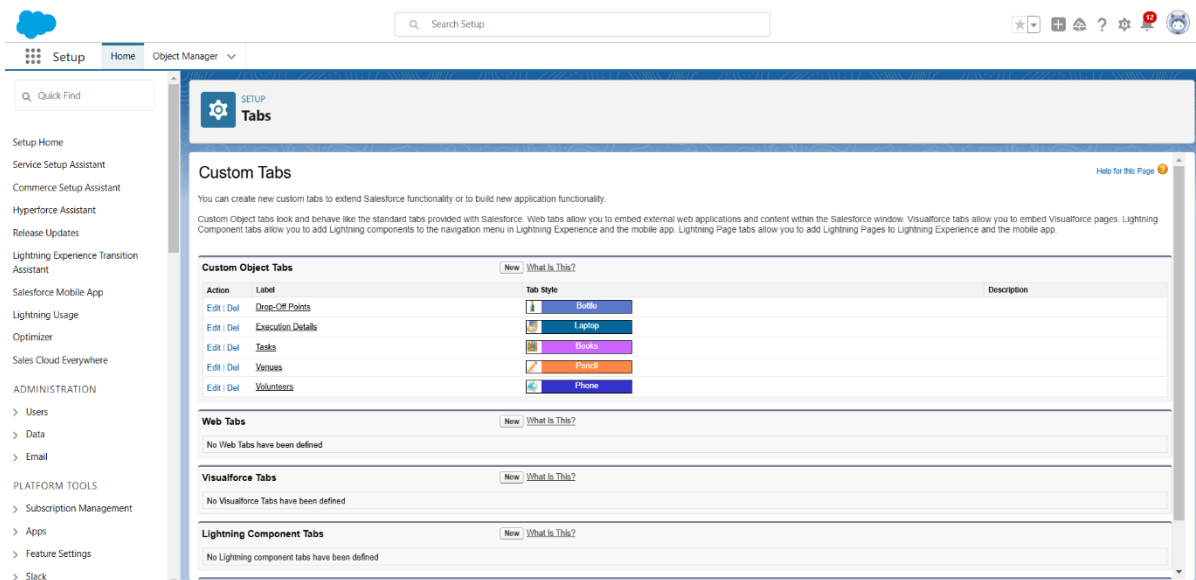

behave like standard salesforce.com tabs such as accounts, contacts, and opportunities.

Lightning Component Tabs

Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page Tabs Lightning Page Tabs let you add Lightning Pages to the mobile app navigation menu. Lightning Page tabs don't work like other custom tabs. Once created, they don't show up on the All Tabs page when you click the Plus icon that appears to the right of your current tabs. Lightning Page tabs also don't show up in the Available Tabs list when you customize the tabs for your apps.

To create a Tab:(Venue,“Drop-Off Point, Task, Volunteer, Execution Details”.)

1. Go to setup page >> type Tabs in Quick Find bar >> click on tabs >> New (under custom object tab)

1. Select Object(Venue) >> Select the tab style >> Next (Add to profiles page) keep it as default >> Next (Add to Custom App) uncheck the include tab .
2. Make sure that the Append tab to users' existing personal customizations is checked.
3. Click save

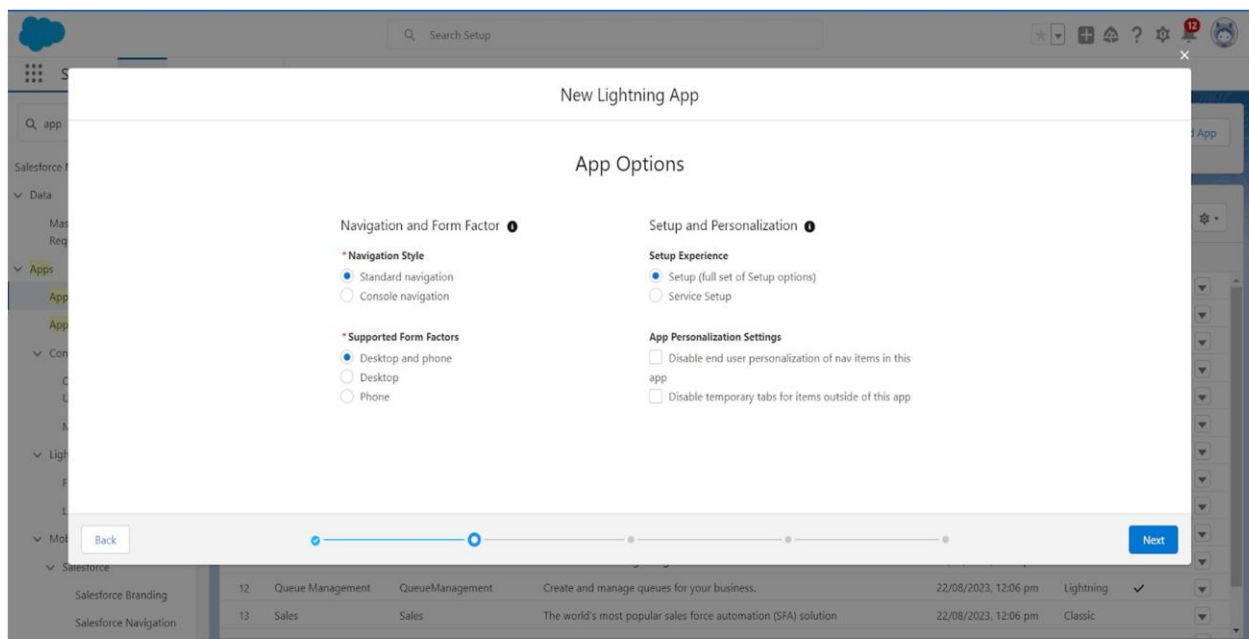

The Lightning App

An app is a collection of items that work together to serve a particular function. In Lightning Experience, Lightning apps give your users access to sets of objects, tabs, and other items all in one convenient bundle in the navigation bar.

Lightning apps let you brand your apps with a custom color and logo. You can even include a utility bar and Lightning page tabs in your Lightning app. Members of your org can work more efficiently by easily switching between apps. To create a lightning app page:

To create a lightning app page:

1. Go to setup page >> search “app manager” in quick find >> select “app manager” >> click on New lightning App
2. Fill the app name in app details and branding as follow
App Name : FoodConnect
Developer Name : This will auto populated
Image : optional (if you want to give any image you can otherwise not mandatory) Primary color hex value : keep this default.
3. Then click Next >> (App option page)Set Navigation Style as Standard Navigation >> Next.

- 4.(Utility Items) keep it as default >> Next.
5. To Add Navigation Items:
Search for the item in the (Home, Venue, Drop-Off Point, Task, Volunteer, Execution Details, Reports) from the search bar and move it using the arrow button >> Next >> Next.

6. To Add User Profiles:

Fields

When we talk about Salesforce, Fields represent the data stored in the columns of a relational database. It can also hold any valuable information that you require for a specific object. Hence, the overall searching, deletion, and editing of the records become simpler and quicker. Types of Fields

1. Standard Fields
2. Custom Fields

Standard Fields:

As the name suggests, the Standard Fields are the predefined fields in Salesforce that perform a standard task. The main point is that you can't simply delete a Standard Field until it is an on required standard field. Otherwise, users have the option to delete them at any point from the application freely. Moreover, we have some fields that you will find common in every Salesforce application. They are,

1. Created By
2. Owner
3. Last Modified
4. Field Made During object Creation

Custom Fields:

On the other side of the coin, Custom Fields are highly flexible, and users can change them according to requirements. Moreover, each organizer or company can use them if

necessary. It means you need not always include them in the records, unlike Standard fields. Hence, the final decision depends on the user, and he can add/remove Custom Fields of any given form.

Creation of Relationship fields in objects

Creation of Lookup Relationship Field on Volunteer Object :

1. Go to setup >> click on Object Manager >> type object name(Volunteer) in the search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Master Detail relationship
4. Select the related object “Drop-Off point” and click next.
5. Field Name : Drop_Off_point
6. Field label : Auto generated
7. Next >> Next >> Save.

Creation of Master Detail Relationship Field on Execution Details Object :

8. Go to setup >> click on Object Manager >> type object name(Execution Details) in the search bar >> click on the object.
9. Now click on “Fields & Relationships” >> New
10. Select Master Detail relationship
11. Select the related object “Volunteer” and click next.
12. Field Name : Volunteer
13. Field label : Auto generated
14. Next >> Next >> Save.

Creation of Master Detail Relationship Field on Execution Details Object :

15. Go to setup >> click on Object Manager >> type object name(Execution Details) in the search bar >> click on the object.
16. Now click on “Fields & Relationships” >> New
17. Select Master Detail relationship
18. Select the related object “Task” and click next.

19. Field Name : Task
20. Field label : Auto generated
21. Next >> Next >> Save.

Creation of Lookup Relationship Field on Drop-Off Point Object :

22. Go to setup >> click on Object Manager >> type object name(Drop-Off Point) in the search bar >> click on the object.
23. Now click on “Fields & Relationships” >> New
24. Select Lookup relationship
25. Select the related object “Venue” and click next.
26. Field Name : Venue
27. Field label : Venue__c
28. Next >> Next >> Save.

Creation of Lookup Relationship Field on Task Object :

29. Go to setup>> click on Object Manager >> type object name(Task) in the search bar >> click on the object.
30. Now click on “Fields & Relationships” >> New
31. Select Lookup relationship
32. Select the related object “Venue” and click next.
33. Field Name : Sponsored By
34. Field label : Auto generated
35. Next >> Next >> Save.

Creation of Lookup Relationship Field on Task Object :

36. Go to setup>> click on Object Manager >> type object name(Task) in the search bar >> click on the object.
37. Now click on “Fields & Relationships” >> New
38. Select Lookup relationship
39. Select the related object “Drop-Off point” and click next.
40. Field Name : Drop-Off point

41. Field label : Auto generated.

Creation of fields for the Venue object

1. Go to setup>> click on Object Manager >> type object name(Venue) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Email” and Click on Next
4. Fill the Above as following: ● Field Label : Contact Email
 1. Field Name : Contact Email
 2. Click on required check box
 3. Click on Next >> Next >> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Venue) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Phone” and Click on Next
4. Fill the Above as following:
 1. Field Label : Contact Phone
 2. Field Name : Contact Phone
 3. Click on required check box
 4. Click on Next >> Next >> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Venue) in search bar >>click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Geolocation” and Click on Next
4. Fill the Above as following:
 1. Field Label : Location
 2. Decimal Places : 4
 3. Field Name : Location
 4. Description : Enter the Geolocation of your Venue
 5. Click on Next >> Next >> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Venue) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Long Text Area” and Click on Next
4. Fill the Above as following:
 1. Field Label : Venue Location
 2. Field Name : Venue_Location
 3. Click on Next >> Next >> Save and new.

Creation of fields for the Drop-Off point object

Go to setup >> click on Object Manager >> type object name(Drop-Off point) in search bar >> click on the object.

1. Now click on “Fields & Relationships” >> New
2. Select Data type as a “Geolocation” and Click on Next
3. Fill the Above as following:
 - a. Field Label : Location 2
 - b. Field Name : gets auto generated
 - c. Description : Enter the Geolocation of the Drop off Point
 - d. Geolocation Options : select Decimal
 - e. Decimal Places : 4
 - f. Click on Next >> Next >> Save and new.

To create another fields in an object:

- a. Go to setup >> click on Object Manager >> type object name(Drop-Off point) in search bar >> click on the object.
- b. Now click on “Fields & Relationships” >> New
- c. Select Data type as a “Formula” and Click on Next
- d. Fill the Above as following:
- e. Field Label : distance calculation
- f. Field Name : distance_calculation
- g. Formula Return Type : Number
- h. Formula Options : DISTANCE(Location_2_c , Venue_r.Location_c , 'km')

- i. Click on Next >> Next >> Save and new. To create another fields in an object:
 4. Go to setup >> click on Object Manager >> type object name(Drop-Off point) in search bar >> click on the object.
 5. Now click on “Fields & Relationships” >> New
 6. Select Data type as a “Picklist” and Click on Next
 7. Fill the Above as following: ● Field Label : State
 1. Field Name : State
 2. Enter values, with each value separated by a new line :
Andhra Pradesh
Arunachal Pradesh
Assam
Bihar
Chhattisgarh
Goa
Gujarat
Haryana
Himachal Pradesh
Jharkhand
Karnataka
Kerala
Maharashtra
Madhya Pradesh
Manipur
Meghalaya
Mizoram
Nagaland
Odisha
Punjab
Rajasthan
Sikkim
Tamil Nadu
Tripura
Telangana
Uttar Pradesh
Uttarakhand
West Bengal
Andaman & Nicobar (UT)

Chandigarh (UT)
Dadra & Nagar Haveli and Daman & Diu (UT)
Delhi [National Capital Territory (NCT)]
Jammu & Kashmir (UT)
Ladakh (UT)
Lakshadweep
(UT) Puducherry

1. Click on required check box
2. Click on Next >> Next >> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Task) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Number” and Click on Next
4. Fill the Above as following: ● Field Label : Distance
 1. Field Name : Distance
 2. Length : 14
 3. Decimal Places : 4
 4. Click on required check box
 5. Click on Next >> Next >> Save and new.

Creation of fields for the Task object

Go to setup>> click on Object Manager >> type object name(Task) in search bar >> click on the object.

1. Now click on “Fields & Relationships” >> New
2. Select Data type as a “Auto Number” and Click on Next
3. Fill the Above as following: ● Field Label : Task ID
 - a. Display Format : TASK-{0}
 - b. Starting Number : 1
 - c. Field Name : gets auto generated
 - d. Click on required check box
 - e. Click on Next >> Next >> Save and new.

To create another fields in an object:

- a. Go to setup >> click on Object Manager >> type object name(Task) in

search bar >> click on the object.

- b. Now click on “Fields & Relationships” >> New
- c. Select Data type as a “Date” and Click on Next
- d. Fill the Above as following:
- f. Field Label : Date
- g. Field Name : Date
- h. Click on required check box
- i. Click on Next >> Next >> Save and new.

To create another fields in an object:

4. Go to setup >> click on Object Manager >> type object name(Task) in search bar >> click on the object.
5. Now click on “Fields & Relationships” >> New
6. Select Data type as a “Picklist (Multi-Select)” and Click on Next
7. Fill the Above as following:
 1. Field Label : Food Category
 2. Field Name : Food Category
 3. Enter values, with each value separated by a new line :
Veg
Non-Veg
Salad
Snack
4. Click on required check box
5. Click on Next >> Next >> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Task) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Number” and Click on Next
4. **Fill the Above as following:**
 1. Field Label : Number of People Served
 2. Field Name : Number_of_People_Served
 3. Click on required check box
4. Click on Next >> Next >> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Task) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Text” and Click on Next
4. Fill the Above as following:
 1. Field Label : Name of the Person
 2. Field Name : Name_of_the_Person
 3. Click on Next >> Next >> Save and new.

To create another fields in an object:

1. Go to setup>> click on Object Manager >> type object name(Task) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Phone” and Click on Next
4. Fill the Above as following:
 1. Field Label : Phone
 2. Field Name : Phone
 3. Click on Next >> Next>> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Task) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Pick List” and Click on Next
4. Fill the Above as following:
 1. Field Label : Rating
 2. Field Name : Rating
 3. Enter values, with each value separated by a new line :
 - 1
 - 2
 - 3
 - 4
 - 5

4. Click on Next >> Next >> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Task) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Long Text Area” and Click on Next
4. Fill the Above as following:
 1. Field Label : Feedback
 2. Field Name : Feedback
3. Click on Next >> Next >> Save and new.

Creation of fields for the Volunteer object

1. Go to setup >> click on Object Manager >> type object name(Volunteer) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Auto Number” and Click on Next
4. **Fill the Above as following:**
 - a. Field Label : Volunteer ID
 - b. Field Name : gets auto generated
 - c. Click on required check box
 - d. Click on Next >> Next >> Save and new.
 - e. Click on Next >> Next >> Save and new.

To create another fields in an object:

- a. Go to setup >> click on Object Manager >> type object name(Volunteer) in search bar >> click on the object.
- b. Now click on “Fields & Relationships” >> New
- c. Select Data type as a “Picklist” and Click on Next
- d. Fill the Above as following:
 - f. Field Label : Gender
 - g. Field Name : Gender
 - h. Enter values, with each value separated by a new line :

Female

Male

- i. Click on Next >> Next >> Save and new.

To create another fields in an object:

5. Go to setup >> click on Object Manager >> type object name(Volunteer) in search bar >> click on the object.
6. Now click on “Fields & Relationships” >> New
7. Select Data type as a “Date” and Click on Next
8. Fill the Above as following: ● Field Label : Available On
 1. Field Name : Available On
 2. Click on required check box
 3. Click on Next >> Next >> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Volunteer) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Number” and Click on Next
4. Fill the Above as following:
 1. Field Label : Age
 2. Field Name : Age
 3. Click on required check box
 4. Click on Next >> Next>> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Volunteer) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Email” and Click on Next
4. Fill the Following:
 - Field Label : Email
 - Field Name : Email
 1. Click on required check box
 2. Click on Next>> Next >> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Volunteer) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Number” and Click on Next
4. Fill the Above as following:
 1. Field Label : Contact Number
 2. Field Name : Contact_Number
 3. Click on required check box
 4. Click on Next >> Next >> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Volunteer) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Text Area (Long)” and Click on Next
4. Fill the Above as following:
 1. Field Label : Address
 2. Field Name : Address
 3. Click on Next >> Next >> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Volunteer) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Date” and Click on Next
4. Fill the Above as following:
 - Field Label : Date of Birth
 - Field Name : Date_of_BirthClick on Next >> Next >> Save and new.

Create Flow to create a record in Venue object

1. Go to setup >> type Flow in quick find box >> Click on the Flow and Select the New Flow.
2. Select the Screen flow. Click on create.

1. Click on the '+' icon in between start and end, and click on screen element.
2. Under the Screen Properties:
 - Label : Venue Details
 - API Name : Venue_Details
3. Now lets add components in this flow. Click on Text Component and name it as: Label : Venue Name
 - API Name : Venue_Name
4. Click on Email Component and name it as: Label : Email
 - API Name : Contact_Email
5. Click on Phone Component and name it as: Label : Phone
 - API Name : Contact_Phone
6. Click on Text Component and name it as: Label : Venue Location
 - API Name : Venue_Location
7. Click on Number Component and name it as: Label : Latitude
 - API Name : Latitude
8. Click on Number Component and name it as:
 - Label : longitude
 - API Name : longitude
9. Next click on Done. This would look like below
10. Click on the '+' icon in between Venue details and end, and click on create record element. 13. Now label it as
 - Label : Create Venue Record
 - API Name : Create_Venue_Record
 - How Many Records to Create : One

How to Set the Record Fields : Use separate resources, and literal values

Object : Venue

Set Field Values for the Venue : Click on 'Add Field' 5 times

Field : Value = Contact_Email__c : {!Contact_Email.value}

Field : Value = Contact_Phone__c : {!Contact_Phone.value}

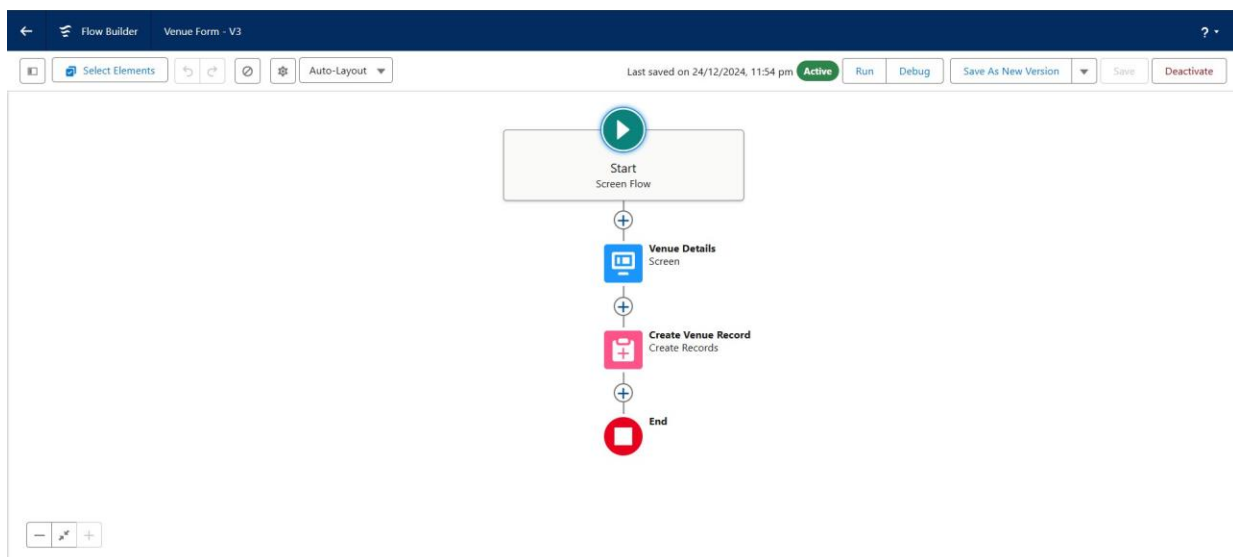

Field : Value = Name : {!Venue_Name}

Field : Value = Venue_Location__c : {!location}

Field : Value = Location__Latitude__s : {!latitude}

Field : Value = Location__Longitude__s : {!longitude}

☆ This would look like:

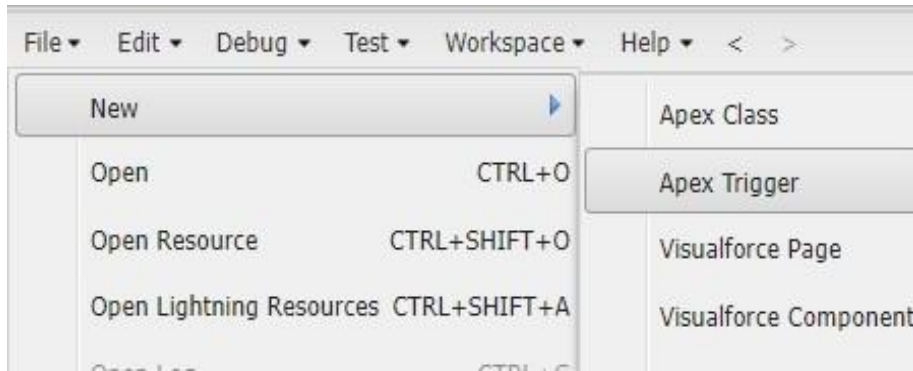

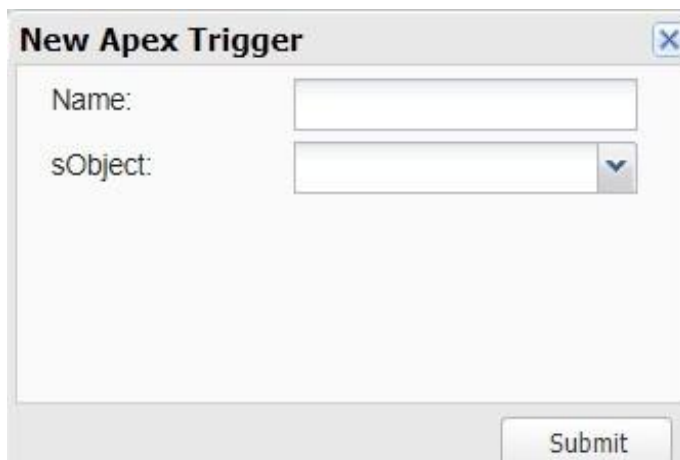

☆ Click on Save as: Flow Label : Venue Form

Flow API Name : Venue_Form

Create a Trigger

1. Log into the trailhead account, navigate to the gear icon in the top right corner.
2. Click on developer console and you will be navigated to a new console window.
3. Click on the File menu in the toolbar, and click on new >> Trigger.
4. Enter the trigger name and the object to be triggered.

1. Enter Name : DropOffTrigger sObject: Drop-Off Point
2. Click on Submit.

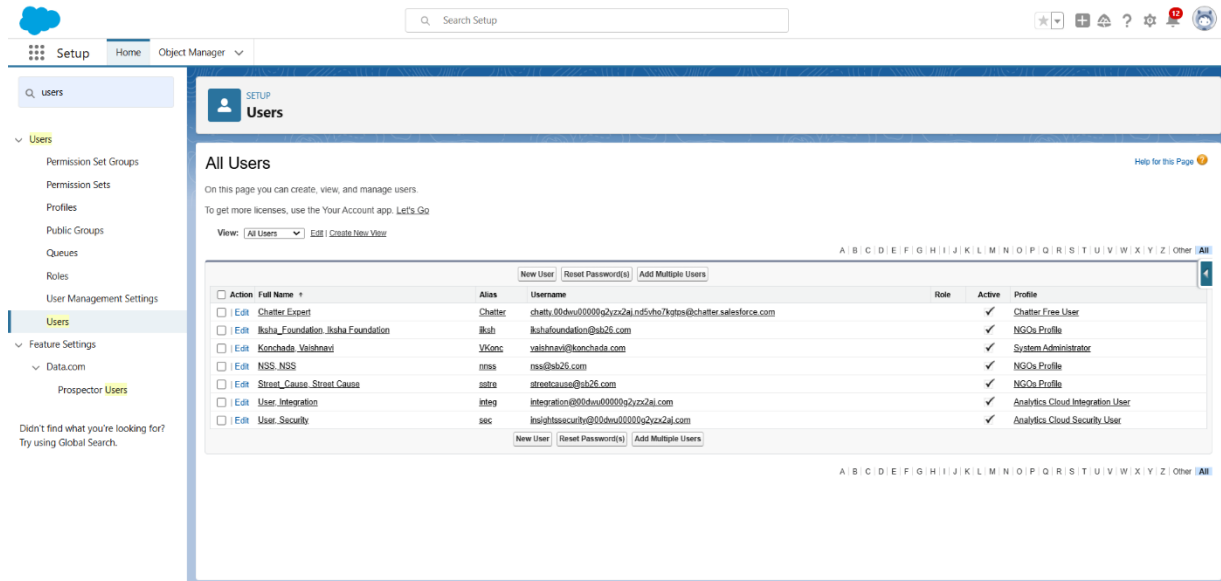

Profiles

A profile is a group/collection of settings and permissions that define what a user can do in salesforce. Profile controls "Object permissions, Field permissions, User permissions, Tab settings, App settings, Apex class access, Visual force page access, Page layouts, Record Types, Login hours & Login IP ranges. You can define profiles by the user's job function. For example System Administrator, Developer, Sales Representative.

1. Go to setup page >> type Profiles in Quick Find bar >> click on Profiles >> click on 'S'
2. Click on Clone beside Standard Platform User.

3. Under Clone Profile: Profile Name : NGOs Profile

Then click on Save

Users

On this page you can create, view, and manage users.
To get more licenses, use the Your Account app. Let's Go

View: **All Users** | [Edit](#) | [Create New User](#)

Creation of Users

In our Project we consider them as NGO's

Creation of User1

1. Go to setup page >> type users in Quick Find bar >> click on users>> New user.
2. In General Information give details as: (Note : create users as per your wish NGO's)

First Name : Iksha Foundation

Last Name : Iksha_Foundation

Alias : iiksh

Email : Give Your Email

Username : ikshafoundation@sb.com (give the username different) Nickname :

Auto Populated

User License : Salesforce Platform

Profile : NGOs Profile

Active: Check

The screenshot shows the 'User Setup' page for a specific user. The left sidebar contains navigation options like 'Users', 'Permission Set Groups', 'Permission Sets', 'Profiles', 'Public Groups', 'Queues', 'Roles', and 'User Management Settings'. The main content area displays the 'User Detail' for 'Iksha Foundation Iksha_Foundation'. It includes fields for Name, Alias, Email, Username, Nickname, Title, Company, Department, Division, Address, Time Zone, Locale, Language, Delegated Approver, Manager, and various role-based permissions like 'Salesforce Platform', 'NGOs Profile', 'Marketing User', 'Offline User', 'Knowledge User', 'Flow User', 'Service Cloud User', 'Site.com Contributor User', 'Site.com Publisher User', 'WDC User', 'Mobile Push Registrations', 'Data.com User Type', 'Accessibility Mode (Classic Only)', 'Debug Mode', 'High-Contrast Palette on Charts', 'Load Lightning Pages While Scrolling', 'Salesforce CRM Content User', and 'Receive Salesforce CRM Content Alerts as They...'. At the bottom, there are buttons for 'Edit', 'Sharing', 'Reset Password', 'Freeze', and 'View Summary'.

3. Click on Save

Give Different First Name, Last Name based on Different NGO's.

The screenshot shows the 'All Users' page in the Smart Internz setup. The left sidebar is the same as the previous screenshot. The main content area has a heading 'All Users' and a sub-heading 'On this page you can create, view, and manage users. To get more licenses, use the Your Account app. Let's Go'. Below this, there's a 'View: All Users' dropdown and a 'Create New User' link. A table lists the users with columns for 'Action', 'Full Name', 'Alias', 'Username', 'Role', 'Active', and 'Profile'. The table contains several users, including 'Chatter Expert', 'Iksha_Foundation Iksha_Foundation', 'Konschade_Vaishnavi', 'NSS_NSS', 'Street_Cause_Street Cause', 'User_Integration', and 'User_Security'. At the bottom of the table, there are buttons for 'New User', 'Reset Password(s)', and 'Add Multiple Users'.

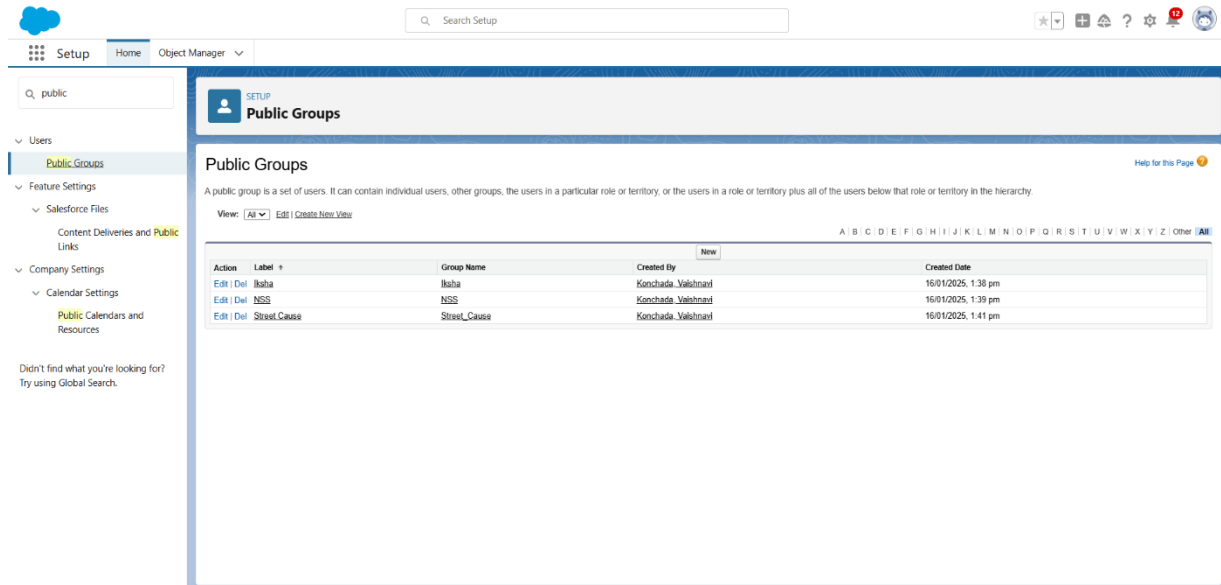

Creation of Public Group

1. Go to setup page >> type Public Groups in Quick Find bar >> click on Public Groups >> click on New.
2. Under Group Information:
 Label : Iksha
 Group Name : Iksha
 Grant Access Using Hierarchies : Check

3. In Search, Select Users.

4. In Selected Members Add Iksha Foundation and System Administrator

Do the same for remaining two NGO's

Conclusion

By leveraging the Salesforce platform, the project successfully established a streamlined and transparent system for managing surplus food donations. Through efficient coordination with volunteers and timely delivery to beneficiaries, the project effectively addressed food insecurity while maximizing the utilization of resources.
